

Once again someone wants to stifle the spirit of competition. Also, every time we pass a bill (law) we lose a piece of our freedom. Leave companies alone and let them create and develop quality products for the consumer. I just recently purchased my satellite radio and I love it. Why should I be FORCED to listen to something I don't enjoy. Basically I don't. I turn off the locals.

Just leave things well enough alone. Let us enjoy our radio. Let us free Americans choose what we want to listen to versus having some stiff-necked lawyer (politician) dictate our choices.

I strongly suggest and request you reject the NAB's Petition 04-160.
